

Mission

To deliver personalized business management solutions that maximize our clients profit, quality, and traceability in the food production, processing, and supply chain.

Global coverage

Since 2001, Tenacious Systems Limited (TSL) has established Partners in multiple countries, providing a global network of expert training, installation, and support services. Most clients receive support from the USA office, or from a regional office or partner depending on client locations.

Expert designers

Tenacious Systems has team members that provide design and analysis services (for designing the TSL products, or satisfying a client's specific requirements) and are highly experienced in multiple vertical markets. This knowledge delivers superior solutions for TSL clients by delivering maximum efficiency and performance.

Clients

TSL clients are typically medium to large sized companies that are innovative leaders in their industry, striving for better quality and service for their customers, with an interest in perpetual improvement of efficiency and safety.

Tenacious Systems Ltd

MEET THE TEAM

TSL's team has a wide variety of experience in management, design, support, and solutions development.

Andrew Burr, General Manager

Andrew has managed multiple software solution companies, and has a passion for details and client satisfaction. Andrew's core vision is to provide relatively exclusive and high quality vertical solutions to a global market.

Al, Barry, David, Michael - Consulting team

TSL has multiple consultants that continually travel the world deploying solutions and providing training and business analysis services.

Belinda Barnes, Account manager

Belinda's experience in client relationship management gives her the perfect skills to manage clients satisfaction and assist TSL partners in becoming experts at supporting clients of TSL solutions.

Linda Dallas, Customer care manager

Several years of support experience in CRM and related solutions gives Linda the edge for providing personalized support for TSL solutions.

Pankaj Kumar, Senior developer

Pankaj has over 12 years experience in ERP and business management solutions, and oversees the day to day development activities from a technical perspective

Nehemiah, Business development manager (Africa)

Nehemiah has a wide range of experience in solutions for horticultural farming, processing, and exporting enterprises across Africa. Nehemiah is currently providing his expertise to assist Tenacious Systems into the growing African market.
